

Use The Clues

If you go to the lake, you can use your kite. You will need some string or kite line, too.

How can you best fly a kite? Use these clues.

It takes time to make a kite.

At home, make sure you have plenty of kite line. You can also use twine.

Tape one side line to the back of the kite frame.

Then tape or tie the other side of the line to your kite reel

Wrap the line around the reel

Take a hike or ride a bike to the lake to use your kite.

Rest in the shade to bide your time until there is some wind.

When it is time, run with your kite while you let out some twine.

It could take some time to get your kite right.

Have fun and be safe! Don't fly a kite when you ride your bike.

When you are done, you can rest in the shade until it is time to go home.
